

FOR IMMEDIATE RELEASE

HEICO Lighting™ and Future Electronics partner and sign a Worldwide Distribution Agreement

Saint-Eustache, QUEBEC (September 13th, 2010) – HEICO Lighting™ and Future Electronics are pleased to announce that both companies have signed a worldwide distribution agreement for HEICO Lighting™ LED lighting solutions.

Under the terms of this agreement, Future Electronics will distribute all HEICO Lighting's™ LED product line: the Virgolite™ and D-LEDbar™ series. The LED product line is mostly dedicated to the electrical signage and architectural market sectors.

“With Future’s ability to provide strong technical support, supply management and fast delivery service, we are looking forward to offer our current and future clients the most advanced and competitive service and product offering worldwide, said Vital Dumais, President and CEO of HEICO Lighting™. With Future Electronics’ 48 hours delivery and stocking capabilities, there’s no doubt in my mind this will change the industry.”

“We are excited to have signed a franchise agreement with HEICO Lighting,” said Bruce Jones, Worldwide Vice President of Marketing. “Their innovative contactless LED modular system simplifies the adoption of LED technology into many lighting applications, and integrates well with our customer expansion plans into new market segments.”

About HEICO Lighting™

HEICO Lighting™ specializes in designing, producing and marketing world-class electronic lighting products. We provide from individual components to private-label turnkey light engines. In the past 25 years, we have introduced major breakthrough technologies, the more recent being: Contactless LED illumination powered by electromagnetic induction and the FIRST Electrolytic Capacitor FREE solid-state power supply. Consistently exceeding market expectations, the company’s mission is to lead the solid state lighting industry while contributing to society through the development of meaningful innovations.
